

Drawing a Scene Quotidien (daily scene).

Step 1

Draw a low rainbow/ semi circle shape from the bottom left across and a small oval on the top right-hand-side (the small circle will be your person's head).

Step 2

Measure the head using your fingers and draw a line down (7 to 8 times the size of your head).

Step 3

Draw a second circle (the same size as your first) down from the right hand side of your head; this will be the width of the neck and shoulder (please do this very, very lightly in pencil).

Step 4

Add body (side profile).

Step 5

Draw facial features and a long rectangle in the left hand corner.

Step 6

Start to add background detailing...

Step 7

Add 2 long, horizontal lines above your wall and 3 vertical lines to make a fence. Add some plant silhouettes above the wall (feel free to make-up some of your own/add flowers).

Step 8

Begin to add colour into your illustration, starting with the large areas first.

Step 9

Once your large areas have dried, start to fill in the intricate detailing.

Step 10

Congratulations, you've finished!

Tips

Draw lightly in pencil at all times.

Have a look at David Hockney's work for colour/background inspiration.

Extention

If you'd like a challenge draw an area of your house with one or more people in (think about the detail, which way they'll be standing and how they'll fit into the space).
