

# Collagraph Printing

## Examples:

Tessa Horrocks

Wendy Tate

Amy Sterly

Suzy Thompson

## Step 2

Once the glue has dried quickly paint over the objects on your test piece.

## Step 4

Look at your test print and decide which materials have come out most clearly and what patterns/textures they've created.

## Step 3

Whilst the paint is still wet, hold your test piece face down onto your larger sheet of paper and apply pressure.

## Step 5

Draw out an illustration/artwork of your choice onto another small sheet of card/paper...

## Step 6

Follow the outline of your illustration with a thick layer of glue and stick your objects over the shape of your pencil lines (think about which objects/textures from your test are most appropriate for your artwork e.g. a fine outline or textured string/fabric to illustrate hair/fur etc).

## Step 7

Paint over the objects on your collagraph base/plate.

## Step 8

Make a print of your artwork

## Extention:

Try painting your collagraph in different colours and make a series of side-by-side prints from your image.

Or

Make two collagraph designs and print them side-by-side.
