**Finished!**

## Instructions

1. Stick an A5 coloured sheet of paper onto a larger sheet of A4 card using PVA glue.
2. Stick a long piece of masking tape to create a triangle on top of your house for a roof (or leave this out if you prefer to create a block of flats).
3. Rip or cut some smaller pieces of coloured paper into squares/rectangles and stick onto your house (bricks).
4. Cut or rip four small pieces of masking tape and two at the top and two at the bottom of your house as windows.
5. Cut or rip a large oval shape out of coloured/recycled paper and glue it to the bottom of your house for the door.
6. Dip your finger in the paint/use a brush to fill the house with different marks/patterns.

**If you wanted to make a block of flats you can just add more windows and not make a roof...**
